

Charles Rodolphe Brupbacher Foundation
9th Symposium
February 11 - 13, 2009
Targets for Cancer Prevention and Therapy

PROGRAM

Wednesday, February 11, 2009

| | | |
|---------------|---|---|
| 13:00 - 14:30 | | Registration / Coffee |
| 14:30 - 16:00 | Chair: Holger Moch 14:30 - 15:00 15:00 - 15:30 15:30 - 16:00 | Signal Transduction Pathways as Targets for Cancer Prevention and Therapy Moshe Oren, Rehovot: P53 and cancer: One gene, many faces Klas G. Wiman, Stockholm: Restoration of mutant p53 function as therapeutic strategy Webster K. Cavenee, La Jolla: Targeted therapies: The importance of signaling molecules |
| 16:00 - 16:30 | | Coffee break |
| 16:30 - 17:30 | Chair: Susan Gasser 16:30 - 17:00 17:00 - 17:30 | Gene Regulation Christoph Plass, Heidelberg: DNA promoter methylation in cancer Joseph Nevins, Durham: Genomic Strategies for personalized cancer therapy |
| 17:30 - 18:30 | | Apéro |
| 19:00 - 20:00 | | Charles Rodolphe Brupbacher Lecture Thomas Zeltner: Krebsprävention als politische Herausforderung Public Lecture in the Aula of the University of Zurich |

Thursday, February 12, 2009

| | | |
|---------------|--|--|
| 08:00 - 08:30 | | Registration |
| 08:30 - 10:00 | Chair: Chris Wild 08:30 - 09:00 09:00 - 09:30 09:30 - 10:00 | Cancer Causes and Prevention D. Maxwell Parkin, Oxford: The global burden of cancer: Trends and perspectives Nubia Muñoz, Lyon: From causality to prevention: The case of cervical cancer Curtis C. Harris, Bethesda: MicroRNAs and inflammatory cytokines as biomarkers of cancer diagnosis, prognosis, and therapeutic outcome |
| 10:00 - 11:00 | | Coffee break + Posters |
| 11:00 - 12:00 | Chair: Pierre Clavien 11:00 - 11:30 11:30 - 12:00 | Rudolf Kaaks, Heidelberg: Nutritional energy balance and cancer risk: Epidemiological evidence implicating insulin and insulin-like growth factor-I. Sir Richard Peto, Oxford: Changing cancer mortality |
| 12:00 - 13:00 | | Lunch + Posters No. 1 - 60 |
| 13:00 - 14:00 | | Lunch + Posters No. 61 - 118 |
| 14:00 - 14:30 | | Coffee break |
| 14:30 - 16:30 | Chair: Josef Jiricny 14:30 - 15:00 15:00 - 15:30 15:30 - 16:00 16:00 - 16:30 | Cancer Genetics, Gene Function and Metastasis Olli P. Kallioniemi, Helsinki: Diagnostic and therapeutic discoveries from genome-scale functional and translational cancer research Carolyn C. Compton, Bethesda: The Cancer Genome Atlas (TCGA) Project William G. Kaelin, Boston: The von Hippel-Lindau tumor suppressor gene: Oxygen sensing and cancer Michael Karin, San Diego: How metastatic cells usurp innate immunity and inflammatory processes |
| 16:30 - 17:00 | | Break |
| 17:00 - 18:30 | Andreas Fischer, Rector Klaus W. Grätz, Dean Frédérique Brupbacher | Award Ceremony and Lectures of the Awardees |
| 18:30 - 19:45 | | Apéro |

Charles Rodolphe Brupbacher Foundation
9th Symposium
February 11 - 13, 2009
Targets for Cancer Prevention and Therapy

PROGRAM

Friday, February 13, 2009

| | | |
|----------------------|---|--|
| 08:30 - 10:00 | Chair: Michael Arand 08:30 - 09:00 09:00 - 09:30 09:30 - 10:00 | Apoptosis and DNA Damage Simone Fulda, Ulm: <i>Apoptosis proteins as targets for anticancer therapy</i> Ulrich Hübscher, Zürich: <i>Repair of oxydative damage</i> Carlo Croce, Columbus: <i>micro-RNA mediated suppression of tumorigenesis</i> |
| <i>10:00 - 10:30</i> | | <i>Coffee break</i> |
| 10:30 - 12:00 | Chair: Alexander Knuth 10:30 - 11:00 11:00 - 11:30 11:30 - 12:00 | Stem Cells Lukas Sommer, Zürich: <i>Cancer stem cells in melanoma: Potential culprits for tumor growth and metastasis</i> Jörg Huelsken, Lausanne: <i>Cutaneous cancer stem cells</i> Michael F. Clarke, Stanford: <i>Molecular analysis of normal and malignant epithelial stem cells</i> |
| 12:00 - 12:30 | Holger Moch Frédérique Brupbacher Paul Kleihues | Presentation of Charles Rodolphe Brupbacher Young Investigator Awards Closing Remarks |
